-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Claim Objections***

1. Claim 1 is objected to because of the following informality:

In line 2, change "(3a0" to read, "(3)".

2. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 1-10** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claims 1-10, the phrase "characterized in that" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. **Claims 1-4, 8 and 9** are rejected under 35 U.S.C. 102(b) as being anticipated by Wang 5,933,900.

Wang discloses a surface treating apparatus comprising: a shaft **(114)** with a handle by means of which the apparatus can be guided on the surface to be cleaned and a frame structure **(22)** having several rolls **(80,78,84,76,82)** about which an endless conveyor belt **(28)** for liquid and dirt particles is arranged so that a portion of the belt between the rolls **(82,80)** abuts the surface and is placed such that it is mainly parallel to the surface the apparatus being provided with a scratching means **(78,79)** abutting the conveyor belt **(28)** and removing liquid and dirt particles from the belt; the frame structure comprises a mainly flat wall portion **(at 30)** that the conveyor belt **(28)** abuts and that is mainly parallel to the surface; the frame structure is box shaped and encloses an electric motor with a drive shaft that by means of a gear transmits the driving motion of the drive shaft to at least one of the rolls **(col. 7, lines 24-45)**; the frame structure supports a removable container part **(98)** in which liquid and dirt particles are collected; the frame structure comprises at least two parts **(80,82)** that are turnable with respect to one another and that when the parts are aligned with one another constitute a track for the conveyor belt **(28)** and which when the parts are angled with respect to one another admits that the conveyor belt is removed from the track; the conveyor belt comprises a support layer with an outer micro fiber layer **(col. 6, lines 4-14)**.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. **Claims 5-6 and 10** are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang in view of Lynn 5,203,047.

Wang is described above. **Referring to claims 5 and 6**, Wang does not specifically disclose a pump. Lynn discloses a cleaning apparatus having a pump so as to pump the cleaning fluid through the supply tube. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made Wang's apparatus to have a pump as taught by Lynn so as to pump the cleaning fluid through the supply tube.

**Referring to claim 10**, Wang does not specially disclose a nozzle. Lynn discloses the use of a nozzle so as to spray the cleaning fluid to the surface to be cleaned. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made Wang's apparatus to have a nozzle as taught by Lynn so as to spray the cleaning fluid to the surface to be cleaned.

10. **Claim 7** is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang in view of Lynn and in further view of Chupin et al. 4,918,778.

Wang as modified is described above. The modified Wang does not specifically disclose a filter. Chupin et al. discloses a rotary band cleaning device for cleaning a

conveyor belt the device having a filter so as to remove sediments from the cleaning fluid prior to the reuse thereof. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have installed a filter in the modified Wang's apparatus as taught by Chupin et al. so as to remove sediments from the cleaning fluid prior to the reuse thereof.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALVIN J. GRANT whose telephone number is (571)272-4484. The examiner can normally be reached on Mon-Fri 8:00-4:30.
